# Caution

**Before operating the set, please read this manual carefully.**

## **WARNING:**

*To reduce the risk of electric shock does not remove cover (or back). No user serviceable parts inside. Refer servicing to qualified service personnel. To prevent fire or shock hazard, do not expose the rear of the set to rain or moisture. Do not rub or strike the Active Matrix LCD with anything hard as this may scratch, mark, or damage the Active Matrix LCD permanently.*

*Unauthorized tampering with the inside of the monitor invalidates the warranty.*

*The manufacturer shall not warrant for any damage caused by improper maintenance and/or repair. Work by third parties.*

*Important safeguards for you and your new product:*

*Your product has been manufactured and tested with your safety in mind. However, improper use can result in potential electrical shock or fire hazards. To avoid defeating the safeguards that have been built into your new product, please read and observe the following safety points when installing and using your new product and save them for future reference.*

### ***Read Instructions***

### ***Follow Instructions***

All operating and use instructions should be followed.

### ***Retain Instructions***

The safety and operating instructions should be retained for future reference.

### ***Heed Warnings***

All warnings on the product and in the operating instructions should be adhered to.

### ***Cleaning***

Disconnect the unit from the electricity supply before cleaning. Do not use abrasive cleaners. Use a damp cloth for cleaning.

### ***Water and Moisture***

Do not use this apparatus near water.

### ***Transporting Product***

A product and cart combination should be moved with care. Quick stops, excessive force and uneven surfaces may cause the product and cart combination to overturn.

### ***Attachments***

Do not use attachments not recommended by **Boland** as they may cause hazards.

### ***Ventilation***

Do not block any of the ventilation openings.

Install in accordance with the manufacturer's instructions.

### ***Power Sources***

This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your supplying dealer.

### ***Power Lead Polarization***

This product is equipped with a three-wire grounding-type cord. This is a safety feature. Do not defeat the safety purpose of the grounding-type cord.

### ***Power Cord Protection***

Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles and the point where they exit from the product.

### ***Outdoor Cable Grounding***

# **Caution**

If an outside antenna or cable system is connected to the product, be sure the antenna or cable system is grounded so as to provide some protection against voltage surges and built-up static charges. A "face plate" also needs to be installed with an isolating capacitor to prevent any damage from static.

## ***Lightning***

For added protection for this product during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent possible damage to the product due to lightning and power-line surges.

## ***Power Lines***

An outside antenna system should not be located in the vicinity of overhead power lines or other electric light or power circuits, or where it can fall into such power lines or circuits. When installing an outside antenna system, extreme care should be taken to avoid contact with such power lines or circuits, as contact with them might be fatal.

## ***Earthing the product***

This product must be earthed properly to comply with the safety regulations in the country of use. If you are unsure of these regulations, please consult a qualified electrician.

## ***Servicing***

Do not attempt to service this product yourself as opening or removing covers may expose you to dangerous voltages or other hazards. Refer all servicing to qualified service personnel. If the Set does not operate properly, switch it off and call your dealer.

## ***Damage Requiring Service***

Isolate this product from the mains supply and refer servicing to qualified service personnel under the following conditions:

- If the power-supply cord or plug is damaged.
- If the glass front has been damaged.
- If there is ingress of water between the glass and the LCD screen.
- If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to its normal operation.
- If the product has been dropped or the cabinet has been damaged.
- If the product exhibits a distinct change in performance.

## ***Safety Check***

Upon completion of any service or repairs to this product, ask the service technician to perform safety checks to determine that the product is in proper operating condition and the front seal is intact.

## ***Mounting***

The product should be mounted on a wall only as recommended in the instructions.

## ***Power***

This set operates on a DC supply; the voltage is as indicated on the label on the Monitor.

# Features

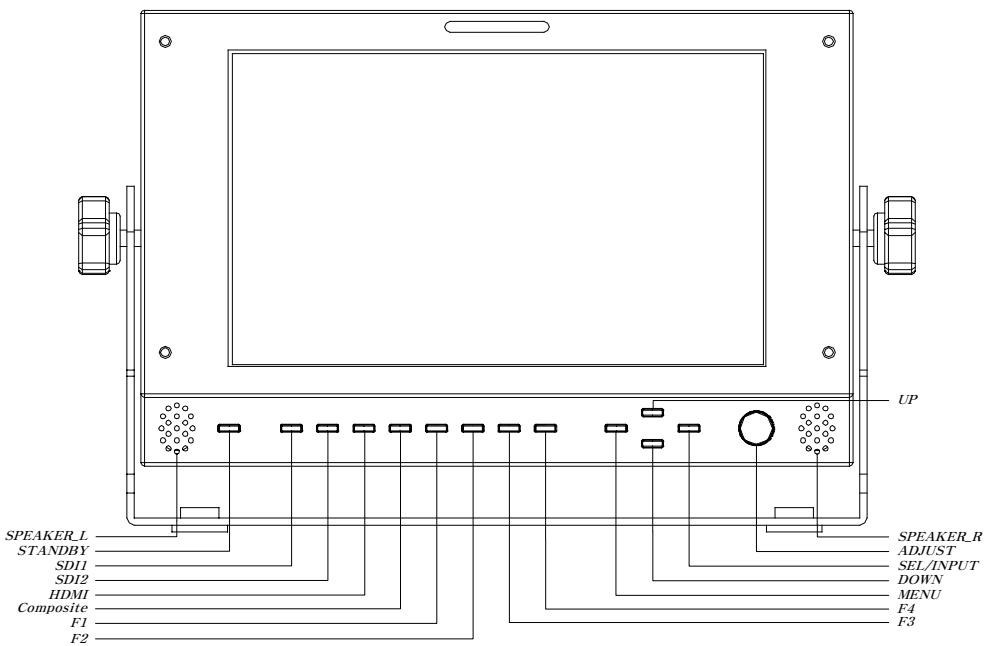

This product is the multi-format Digital LCD Panel to display various kinds of digital video input signal as HD/SD-SDI/DVI/HDMI Digital and analog signal such as Composite/S-Video/RGB/PC-RGB/ Component.

This is also High Definition Broadcasting Monitor which can make it available to do output of stable video signal with the menu of considering convenient user interface and the easy control for brightness and color, and by EQ function of HD-SDI input part.

- 3G/HD/SD SDI 2 Inputs / 1 Output.

\*Tally: Red LED light at top of screen.

\*\*Tri-State: The tally pin on the Lemo rests at +1.7 volts (open circuit). Exerting either a Gnd or +5v onto the pin causes the Tally to light. The Lemo's pin assignments are marked on the back of the cabinet. Experiment on one of the monitors.

# MENU Basic Operation

In this menu system, there are several ways to customize the menu settings provided.

Most menus consist of three levels to set up the options, but some require greater depth for the variety of settings. If you press the **MENU** button, only the first and second level of the menu system will appear on the monitor screen. The third level can be displayed by pressing **SEL/INPUT**. If a menu has more than three levels, the pop-up dialogue box will be displayed as the fourth or fifth level.

## To show and remove the Menu

Press the **MENU** button to display the menu. A second press of the **MENU** button will take you back to monitor viewing.

## To go to the next level

Press **SEL/INPUT** button.

## To go back to the previous level

Press **MENU** button

## Typical Menu Operation

1. Press **MENU** button: The main menu will appear.
2. Use **UP/DOWN** button to select the desired menu option (icon).
3. While the desired menu option is selected, press **SEL/INPUT** to move to the second level.
4. Use **UP/DOWN** button to select the second menu option.
5. Press **SEL/INPUT** to move to the third level: Some menu options require additional steps.
6. Press **MENU** to return to the previous menu to return to monitor viewing.

## Turning On the Monitor

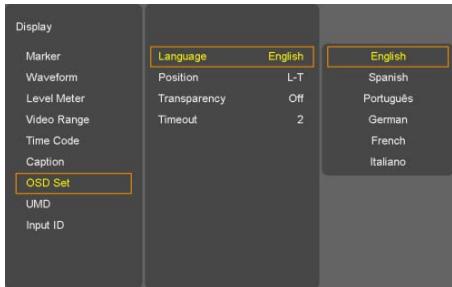

1. First, connect power cord correctly. At this moment, the monitor switches to standby or power on mode. In standby mode, in order to turn monitor on, press the **ST-BY** button.
2. Select the viewing source by using **SEL/INPUT** button on Keypad in front of monitor

## Volume Adjustment

1. Press the **Adjust** button on Keypad.(Turn Right / Turn Left)
2. If you want to switch the sound off, press the **FUNCTION (Audio mute)** button.
3. You can cancel this function by pressing the **FUNCTION (Audio mute)** or volume control button.

# MENU Basic Operation
